[illegible]

**Figure 6.** The effect of the number of iterations ( $n$ ) on the accuracy of the proposed algorithm. The results are shown for different values of  $\alpha$  and  $\beta$ . The x-axis represents the number of iterations ( $n$ ), ranging from 0 to 100. The y-axis represents the error, ranging from 0 to 1. The legend indicates the following parameter sets:

- ( $\alpha = 0.9, \beta = 0.8$ ): Blue line with square markers
- ( $\alpha = 0.7, \beta = 0.6$ ): Red line with triangle markers
- ( $\alpha = 0.5, \beta = 0.4$ ): Green line with circle markers
- ( $\alpha = 0.3, \beta = 0.2$ ): Yellow line with diamond markers

The graph shows that the error decreases as the number of iterations increases, and the rate of convergence is higher for larger values of  $\alpha$  and  $\beta$ .
